

## Wall Colmonoy: DEVELOPING WELD REPAIR SOLUTIONS

*Wall Colmonoy has a long-standing and proud tradition of delivering critical engineering support services to Rolls-Royce both in the USA and the UK.*

Aerobraz, a specialised business unit of Wall Colmonoy Limited, located in Pontardawe, Swansea, South Wales, provides Rolls-Royce with welding and brazing solutions for their civil, military and marine gas turbines. Materials such as supernickel alloys, single-crystal and other alloy systems are used in Rolls-Royce engine components such as the Trent, Spey, Tyne, Adour, EJ200 and WR21.

Aerobraz is an aviation standard repair facility providing OEMs with new weld repair solutions for high added value parts. MRO services include fusion welding, vacuum brazing and vacuum furnace heat-treatments all approved to Rolls-Royce and Nadcap standards. Aerobraz Welding Engineers use the latest GTCAW (gas tungsten constricted arc welding) technology specially developed for use on crack sensitive supernickel alloys.
