

A growing aerospace company is searching for an experienced machinist programmer with exceptional skills and experience to expand machining capacity, increase volume and grow business in CNC department

Position Description:

Skilled CNC Machinist Programmer. Ideal candidates have a background in aerospace, precision machine programming using Mastercam and Solidworks software and ability to carry-out engineering functions as/when required.

Required knowledge, skills, and abilities for position:

- Ability to operate mills (Doosan, Haas, Makino)
- Ability to operate lathes (Femco, Haas, Okuma, Romi, manual, VTL)
- Machine set-up ability
- ability to read operation instructions and blueprints
- ability to read gages and other inspection equipment to confirm conformity, and accuracy, of work
- familiarity/experience with holding tight dimensional tolerances
- proficiency in Solidworks and Mastercam (preferred)
- ability to run multiple machines concurrently
- punctual and excellent attendance record
- ability to diagnose & troubleshoot equipment that affects quality, productivity, or safety
- ability to read and understand instructions for quality and safety
- broad knowledge and experience in: mechanical skills, math and computer skills
- Develop job floor routers and prepare material, equipment and labor requirements
- Ability to talk with customers, define requirements and fixtures, define material requirements and operating parameters for processing parts
- above average skills in: multi-tasking, organizational skills, attention to detail
- demonstrated ability to operate in a fast-paced, shop environment
- willingness to be hands-on in the machine shop and work overtime when/as required
- self motivated

Education/experience requirements:

- High School degree or equivalent is required
- minimum 5-year professional work experience and/or training

Physical demands/work environment:

- stand or sit at work station
- use hands and/or fingers to handle, reach or feel
- ability to stand, walk, climb, balance, stoop, kneel, crouch or crawl
- vision abilities required to perform this job include close vision
- ability to lift up to 50 lbs

- reasonable accommodation can be made to enable people with disabilities to perform the described essential functions
